- Power BI
- Excel
- SQL

Programming:

- Python
- Problem Solving
- Algorithms & Data Structures

Data & BI:

- DAX
- Data Cleaning & Modeling
- Data Visualization

PROJECT Experience:

Superstore Sales Analytics Dashboard [Power BI | DAX]

Mar 2026

[GitHub Repo](#) | [Presentation Video](#) | [Live Dashboard](#)

- Designed a multi-page Power BI dashboard to analyze sales performance, profitability, discount impact, customer behavior, and regional trends using the Superstore dataset.
- Built a structured data model with organized DAX measures and dedicated views for executive summary, pricing analysis, product performance, customer purchase behavior, and regional analysis.
- Included KPI tracking, year-over-year comparisons, profitability insights, and map-based analysis to support data-driven business decisions.

E-Commerce Sales Analytics Dashboard [Power BI | DAX | Excel]

Jan 2026

[GitHub Repo](#) | [Presentation Video](#) | [Live Dashboard](#)

- Developed an end-to-end Power BI dashboard on multi-year e-commerce transactional data using a scalable star-schema model across customer, product, segment, location, ship mode, and calendar tables.
- Delivered executive-ready views for customer segmentation, top products, seasonal trends, shipping performance, and interactive filtering by segment, category, month, and year.
